THE REDCLIFF REVIEW

THURSDAY, NOV. 1st, 1928

Number 26.

Hallowe'en Passed off Very Quietly

No Serious Damage Done to Property This Year.

Hallowe'en passed off very quietly as usual this year. There were the customary number of parties and no serious damage was done to property.

We found the Review office this week unharmed and the staff and we hope the boys had a better time putting it over than we had having it away.

From what we can gather it was, on the whole, a very successful Hallowe'en.

Some older boys intended to cut up experts in the school but they were greatly surprised when entering the building to find the principal waiting for them.

According to reports they looked and felt like the chaps from a free lunch counter.

Redcliff Girl is Married in B. C.

Miss Christine McLaughlin Weds Pentiction Man

(From the Pentiction Review) A quiet wedding was performed on the evening of Friday, Oct. 19th, when Clarence Edward Raincock and Miss Christine Marshall McLaughlin were united in marriage at the United Church manse by Rev. A. A. Whitehouse.

Mrs. E. S. Rand attended the bride and the groom was supported by Douglas Raincock, a brother. The couple are both residents of Pentiction.

At the conclusion of the ceremony a reception was held at the home of the groom's parents on Martin street, where a large number of friends of the couple met to extend their congratulations. Thenceforward the couple will take up residence in Pentiction. The bride is a daughter of Mr. and Mrs. D. McLaughlin of Redcliff.

Cows Killed on Railway Crossing

Freight Run Into Herd at The Stain Crossing

A freight from the west this afternoon played havoc with a herd of cows on the Stain crossing. In all six milk cows and a bull were either killed outright or had to be destroyed. Four of the cows belonged to Wm. Waters; one to R. M. Raine and one to M. Brouker.

Robt. Loudon is leaving this week for McLeod where he may spend the winter.

Fire Destroys Feed on J. Ellis Ranch

Supposed to Have Started From Threshing Machine

Ninety loads of hay and green feed, a small shed and a corral were totally destroyed by a fire on the ranch of John Ellis & Son along the river north of town last Saturday afternoon. Although the exact cause of the fire has not been solved, it is presumed to have started from a threshing outfit which was at the ranch at the time. The fire started in the straw stack and, fanned by a brisk wind, soon got beyond control.

Wm. Hillenberg, a farmer of the Norton district, was instantly killed on a railway crossing just west of Dumore last Tuesday. He was hauling grain to Medicine Hat when a train hit his grain truck.

Churches

ST. AMBROSE CHURCH

Rev. J. L. Cooper

22 Sunday—after Trinity. 11 a.m. service and sermon at 11. Children's service and communion at 3 p.m. Service and sermon at 7:30. 23 Sunday—after Trinity. 11 a.m. service and sermon at 11. Children's service and communion at 3 p.m. Service and sermon at 7:30.

GORDON MEMORIAL UNITED CHURCH

Rev. W. B. Smith, Pastor

Organizations meet as follows—men to share in the activities of Gordon Memorial church. Strangers and visitors are very cordially invited to attend the services. The Official Board on 2nd Tuesday in each quarter at 8 p.m. Committee of Stewards on the 2nd Tuesday of each month at 8 p.m. Women's Missionary Society on the 4th Thursday of each month at 8 p.m. Ladies' Aid, every Tuesday, 3 p.m. Mission Band every second Monday at 4:15 p.m.

Services will be held as usual next Sunday. In the morning at 11:15 and in the evening at 7:30.

The Sacrament of the Lord's Supper will be celebrated next Sunday, Nov. 4th at 11:15 a.m. The organ will be in use. The offertory will be a large number of the congregation present at these services.

"Prayer" will be the subject at the evening service next Sunday. Members, the choir, choir practice to hold every Thursday at 8 p.m.

Social services will be held on Nov. 11th. At the evening service the choir will be present, and the form of service appropriate to the church of Canada will be used.

CHURCH OF THE BRETHREN Rev. D. Hollinger, Minister Usual services.

ST. MARY'S CHURCH Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a.m.

Should Petition Pool For Grain Elevator

Now None At Any Stations In This District

This fall we have heard a number of farmers of the district regretting the fact that there were no grain elevators at any of the stations in this immediate vicinity. The result is that the majority of our farmers north of town have long hauls to make to market their grain.

To remedy this the several U. F. A. localities in the district should petition the Minister of the Wheat Pool and see if it would not be possible to have elevators located here and at Bowell.

Harold Fomucha, a graduate of Redcliff school, is now one of the teachers in the Alberta University. He teaches mathematics.

For being drunk in a public place a young man appeared in court last week end and he was fined \$20.00 and costs, the amount provided in the Act.

St. Mary's Altar Society is settling on a supper in St. Ambrose parish hall on Wednesday, Nov. 7th. Supper will be served from 5:30 to 8 o'clock.

The Family Herald and Weekly Star with its wonderful improvements is now regarded as the great Agricultural paper of Canada and the family circle's best magazine.

Last Monday afternoon a number of ladies surprised Mrs. W. J. Fairbanks by calling on her and giving her a bathroom shower. After the shower bath a pleasant social afternoon was spent.

A. E. Pancoast, of the Bowell district, had two truck loads of grain stolen from one of his grain sheds last Friday. To date the thief has not been located but the provincial police are on his trail.

Legion to Attend Service Next Sunday

Will March in a Body to Gordon Memorial Church

The local Legion will attend Gordon Memorial church in a body next Sunday evening in commemoration of the Armistice.

All members are requested to meet promptly at 7 o'clock at the club rooms where the procession will be formed. An appropriate order of service is being arranged for the occasion. An invitation is extended to the public to join in this service with the Legion.

COMPOSITION ON

'A BEAUTIFUL MORNING'

(By Jean Patterson)

It was the first morning in June. The sky was still red in the east where the sun had risen and the birds were singing happily as though they were glad to see the warm sunshine again.

They were moving to and fro as fast as they could, to gather the straw for their nests, or were flying around protecting their young.

It looked as though it was going to be a very fine day. The scenery of the morning was very beautiful. The sky was pale blue, with queer pieces of white clouds looking boldly out here and there.

The green grass was still wet with dew and the first stems of leaves were showing through the opening buds. The hills in the distance looked like large green mounds against the clear, blue sky.

The houses looked very beautiful with their fresh coat of paint and the lawns, vines and hedges blended with the colors of the houses.

To see a morning like this makes life worth living for and I think that even a beautiful picture could not have been any more beautiful than this morning.

To Organize A U. F. A. Local Here

Meeting Called in Cliff Hall For Thursday, Nov. 8th

Farmers of the immediate vicinity of town are calling a public meeting in Cliff Hall on Thursday evening Nov. 8th at 8 o'clock, for the purpose of organizing a U. F. A. local here. Carl Axelsson, organizer for this district, and W. C. Smith, M. L. A., will be present to address the meeting. An invitation is extended to all to attend as it is hoped to form a good strong local here. Those instrumental in taking this final step feel that much good can be accomplished for the town and district by having a strong local, as they feel there are many matters which should be brought to the attention of the local legislature concerning farm and other conditions. Town people are also invited to attend.

CANADIAN CARS IN CROSSING ACCIDENTS

Despite the fact that over three million cars vied Canada from the United States last season, the Railway Commission said that only 5 per cent of the accidents were with Canadian cars driven by men familiar with the country. This means that a very large percentage of the accidents were with American cars.

are much more careless than our American cousins, at least so far as railway crossing accidents were concerned.

Paul Thompson, of the Brooks district, arrived in town this week end and will remain here for the winter.

Mrs. E. H. Walford entertained a number of ladies Wednesday afternoon to bridge. Mrs. Hicks won the first prize. After cards an enjoyable social hour was spent.

The Lord Nelson at Halifax

Citizens of Halifax take very justifiable pride in the fact that in bringing to Britain a ship of a new modern type, they have created a beautiful beauty which, while still too new to have many valued associations, has an atmosphere redolent of those days of grace in which their city had its beginning. The Lord Nelson, but recently opened, has a charm not usually associated with a modern institution of its kind and a decided nautical touch. The grill, for instance, is named the "Ward Room" and at one time the sailor's mess was held there. The ship, too, a very fine old shows the admiral on deck and his men running up a signal at history. The Lord Nelson is, however, a little more than an art centre. It is a very modern hotel of 200 rooms facing the Halifax Public Gardens. Its public and convention rooms are exceptionally well planned and appointed. The design is Georgian, stately and beautiful. While it has been built as the result of a munificent effort, the Lord Nelson is operated by a company, which company has considerable interest in it. It will, therefore, compare very favorably in service and all essentials with the great Chateaux and other hotels of the company.

Masquerade Ball Was Great Success

Fine Array of Costumes And all Enjoy The Evening

One of the most successful and at the same time one of the jolliest evenings in town for some time, was the masquerade ball put on last Tuesday evening at Vega Lodge. The hall was well filled with both spectators and masqueraders and all entered heartily into the spirit of the occasion. Those in comic costume furnished a continuous program of fun, while the character and fancy costumes, with their variety of colors, had a dazzling effect. In all classes the costumes were of such an excellent quality that the judges experienced considerable difficulty in awarding the prizes. They were finally allotted as follows:

Ladies' Character—1st Miss Leamouth, as a ballet dancer; 2nd Miss Patterson, as a clown; 3rd Miss Leamouth, as a pirate; 2nd R. Toulle as an Indian. Both these winners were from Medicine Hat. Ladies' Comic—1st Mrs. Allenback as an old woman; 2nd Mrs. B. Huribert as an old maid; 3rd Mrs. C. C. as a butterfly.

All the comics created much amusement during the evening. Several other costumes—both (or make-up) and the way the character they represented was carried out—were deserving of special mention. These were: Mrs. Sheldon, as an Irish Colleen; Miss Under as Folly; Mrs. Toulle as a squaw; Mrs. Jacobsen, as a butterfly; Miss Maskell as a little girl; Miss Bealer as a snow maid and Miss Jones as night. In the comics John Allanbeck was splendidly gotten up as a tramp and his recitation "The Tramp," was exceptionally well rendered. Bert Sheldon and B. Huribert as Rub and wife were also good.

After the judging, the dance went merrily on till midnight when a splendid lunch was served, after which the evening was again resumed. It was such a jolly evening that all were loath to leave when the Home Sweet Home waltz was played. On the whole the event was a great success and it was exceptionally well conducted, making one of the most enjoyable evenings of the season. The only noticeable lack was the number of young fellows in town who were not in costume. These things are gotten up largely for the young folk and they should show their appreciation by helping to make them a success.

A. McGimpsey has purchased the barber fixtures previously owned by R. Loudon, and he is now located here permanently.

Ed Schuler, who recently succeeded the G. Lemon farm in the Bowell district, bought a fine house in town from Rev. D. Hollinger and had it moved to the farm this week.

Will the friends who were so kind to help in making the hallowe'en supper a success by work, donations and attendance at supper accept our sincere thanks. St. Ambrose W. A. *

A Bienville farmer claims the record for wheat hauling this season. Mr. Christensen hauled 1000 bushels in miles in one day. This looks like a record for the province.

Announcement is made that Albert school student, in grades IX, X, XI and XII, whether in the high school or public school continuation classes, will take part in the international Oratorical contest (Alberta Division) in 1929.

WINTER GOOD

High Grade Merchandise at Low Prices

MEN'S SWEATERS All Pure wool in check designs and plain colors in heavy and fine knit \$2.95 to \$8.50

BLANKETS 10 pr. all wool Blankets, Large Size and Extra Good Quality in white per. per pr. \$10.50

THE HICKS TRADING CO.

Seems To Be A Failure

Latest Disaster In Arctic Proves Driftless Airship Is Impracticable

It is no reflection upon the Italian General Nobile's courage or intelligence to say what was hoped to be gained by his flight to the North Pole. Nations have been put to anxiety and infinite trouble, when aerial balloons have swelled several valuable lives, men have suffered untold hardships, and Amundsen is lost and may be dead. To what end? If the Italia had reached and returned from its goal, who or what would have been the gainer? What, really, would have been the justification to science? How would the world have been helped?

It was reasonable, in past days, that men should have wanted to reach the Pole. There were many questions to be answered. But since men have been there and settled the old controversy about land or water at the earth's top, it is justification for further risk and for the terrible suffering merely to go back there?

One thing alone Nobile seems to have settled. It is the impracticability of the driftless airship. Nobile, according to the journalists who accompanied him, went down in the Arctic against just such a disaster as overtook the Italia. On the night of the 24th, Nobile was sleeping in his berth in the ice. It might form on the side of the bag, break off and be thrown against the fabric of the bag or on the propeller. Or it might form on the driftless airship, which would mean the death of the man who was so light as to be blown away by the wind. But, regardless of all the pretensions that Nobile took, students of flying see in the disaster in the Italia the settling of the old question of impracticability of the driftless airship. Where is the Italia now? It is in company of all the great disasters that have been laid out both in Germany and the United States. Out of eighty-five giant ships of this type built and tried by Germany, not more than ten remain.

The chances of a good moupin, favored by good weather, and actually piloted, flying the Atlantic ocean, have been shown to be far. Not one has yet succeeded in crossing the Atlantic, without the threat of the Atlantic. The moral seems clear. It is that long straits have yet to be taken before sea passage over the oceans can be made by any lighter than air ship; but that the chances of success by the plane are infinitely greater than by the once much vaunted driftless. — From the Ottawa Journal.

The Art Of Silence

The art of silence is one in which the majority of people are not proficient. Indeed, it is a rare achievement. We find the man of excessive volubility everywhere; on the steamer, in the smoking compartment of railway trains, in the business office, in the sound and fury of the bungalow, where our parliament roared and necessary to put a limit to loquacity to the interest of time, patience, expense and efficiency.

Farmers Prosperous

United States agriculturists are raising a hubbub about farm relief might do worse than deprive an elementary to study conditions at Calcutta, India. The farmers of that district, according to the United Press, have since the first of the year purchased 53 tractors, eight carloads of automobiles and one carload of trucks.

Each month the moon-lake is said to be in peril when nearest to the earth and in apogee when farthest from the earth.

"Money is important to the farmer's wife because she can't get it to the city women because she can't keep it."

The average depth of the Arctic ocean is only 16 fathoms.

"How is it you have no more moonbeams?"

"A sprinkler patrol on my handkerchief and they think I own a car."

— Humorous, Madrid.

W. N. S. 1742

Summer Care of the Chickens

Valuable Advice Given In Proper Care and Feeding

Crooked timber bones in chickens is believed to be due more to improper nutrition than to early roasting. This view is expressed in a paper on poultry feeding, published by the Dominion District Poultry Promoter in New Brunswick, and by F. Leslie Williams, of the Dominion Department of Agriculture. These authorities recommend the providing of low brood coops for the chickens, when they are transferred from the brooder house to the colony house. This, they claim, will encourage early roosting and in this way offset a tendency for the birds to crowd together during the night. It is well also at this season to separate the sexes when the chicks reach broiler age. The pullets need careful watching and may be given both grain and mash before fed with cracked corn of larger size. They should be given the very old pullets, the authors claim, should not be expected to eat baby chicks. It is better to get a new, more expensive and the chick at that age will relish the hen's scraps and feed better. The careful attention to the diet of the birds, the authors claim, will result in both the health and drinking vessels are kept clean and well filled. If the ground between brood houses is not kept clean, it will result in the loss of the birds. It is well to remove it to green soil which is not a good practice for the spread of intestinal worms.

While it is important to keep the pullets growing at a rate that is not excessive, it is equally important to keep the growth too rapid by using a high percentage of animal feeds, as this has a tendency to result in the production of eggs that are too small. The authors claim that the egg is the result of the laying of a few eggs and then result which will stop production until well along in the winter.

Cherries In Manitoba

Very Encouraging Results Have Been Obtained At Morden

Cherries are being produced in the province in quantities that are not only encouraging but also profitable. The Dominion Department of Agriculture has been successful in obtaining a large number of seedlings from seedlings more than three-quarters of an inch in diameter in 1928. Last year the fruit was smaller, but on many of the seedlings more plentiful. The superior quality of the seedlings is the result of 1927, published by the Department of Agriculture at Ottawa, says that some of the seedlings are very near fruit while the fruit of others serve very well for canning and making pies. Cherry trees are being used at the station as filters between the standard apple trees. Early Richmond, Dukes, Montmorency and other varieties are being used in the fruit. Trees of these varieties come through the winter without injury, but only some crops have yet been produced on these young trees.

There's A Difference

The difference between a monarchy and democracy seems to be that when King George goes on a holiday the newspapers print a brief item about his Majesty's departure for the grouse shooting. But when Mr. Coudge takes a holiday the world is told the size of his shirt, the length of his fishing rod, the number of fishes he catches at breakfast, what hymns he sang Sunday in church, and a thousand and one details of equally vital importance.

A Quick Thinker

Jim's employer had expected him from his duties for the afternoon, so that he might attend the funeral of a relative, but when Jim reached the office he found that the funeral was a picnic. "Chippendale" on a brass plate caught their attention.

Said the first:

"What in the world is that, Bill?"

"His friend decided it wouldn't do to let the other think his highness was 'Chippendale'."

"Don't you know? Why, a chippendale is a man who teaches young canaries to chirp."

"How is it you have no more moonbeams?"

"A sprinkler patrol on my handkerchief and they think I own a car."

— Humorous, Madrid.

A centaur is a fabled monster, part man and part horse.

Better Equipped Farms

Modern Machinery Is Doing Away With Much Manual Labor

Despite all the gloomy reports of rural depopulation, production of agricultural commodities continues to increase. One it is the result of the mechanization of the farm is more than offsetting the loss of manual labor in the fields. The average large farmer's selection of milking machines, tractors, cultivators, gasoline engines and other agricultural automations and he can cultivate a much larger area with fewer hired hands. He requires a higher type of employee, a man who is as much a mechanic as a tiller of the soil. If his farm unit is large enough to become as much an industrial executive and scientific manager as the farmer.

The nearer farm life gets to mechanized the more it gets away from its original peasantry. The consolidation movement in industry is today to be followed by the consolidation movement in agriculture. Larger farms, better equipped farms, managed by better trained men, will be the result of the future. The farmer has always been a capitalist by nature. He will be more and more so as a capitalist, as time goes on. This will bring him gradually into the realm of higher finance. It is no idle speculation that farming will eventually interest the banker and investor to a degree that it cannot now interest them. The interest, business and finance in farming in the past has been chiefly an interest based upon production of the land, and more than this the egg is the result of the laying of a few eggs and then result which will stop production until well along in the winter.

The drift of men and women from the farm may be viewed with equanimity so long as it is accompanied by the drift of capital and machinery to the farms. — From the Financial Post.

Receives New Appointment

The appointment of Dr. R. C. Wallace, of the University of Manitoba, to the position of president of the University of Alberta, is announced by Dr. H. M. Tury, has been announced by the Minister of Education, Premier Broderick. Dr. Wallace expects to be able to actively take up his duties by the first of September.

Grain Crops For Hay

Harvest That Reported As Giving Best Results

The crops to grow in the provinces for forage is yet an unsettled question. At the Indian Head Experimental Farm, grain crops have been sown in combination did not appear to increase the yield or quality of the hay crop in comparison with others. Barley, sowing the hooded leaf variety, occupied an intermediate position when sown alone in combination with oats. The addition of peas added in field appearance and accordingly produced high green weights, but the position of such mixtures was low when compared on a basis of cured hay. The possibilities of Marquis wheat for this purpose were tried, but its use is not recommended. Among the grain varieties Dunbar oat is reported by the superintendent of the station as having given the best results as an annual hay.

Not Great Expense

Epitaph Of Canada House In London Comparatively Small

The following figures concerning the respective costs of Canada and Australia house in London have been reported by The Canadian Press: Canada house, for 1927, \$3,400, number of staff, 321; Australia house, for 1927, \$335,000, number of staff, 12.

The costs mentioned in regard to Canada house comprise high commission's office, department of immigration, department of trade and commerce, seaborne re-establishment and upkeep of Canada house. The figures do not include cost of nine immigration agency offices, four trade commissioner's offices and expense in connection with the new system of examination of intending emigrants to Canada.

Atlantic Ferry Briters

Miss Amelia Earhart, was woman to fly across the Atlantic, stepped back from American soil after a return journey from Europe by land. She was flown to St. John's, Newfoundland, pilot and mechanic, on her Atlantic trip. Acting Mayor McKee presented each of three aviators with a letter of welcome. During an interview Miss Earhart said she had plans for the immediate future.

Practical Farmers Prosperous

According to a recent census of the farms of the Prairie Provinces, 69.9 per cent of the population had automobiles; 24.8 per cent had telephone; 25.5 per cent had gasoline engines; 21 per cent had tractors; 2.2 per cent had auto trucks; and 2.1 had electric light.

Playground of Ontario

Stone near Guelph, Ontario, bears witness to the fact that the Centuries before Columbus discovered America, an artist was at work in the Grand Valley of the Ohio, Ontario. On a huge flat stone fifty yards from the junction of the Irvine and Grand Rivers, the result of his handiwork, has been discovered by a party of Guelph citizens.

There is no doubt about the age of the archaeological gem because the sculptor carefully chiseled the date 1122 beside his rock carving, which depicts the head of the Indian. The date is plainly visible, even though some scoffers claim that it is 1122 the inhabitants of the Grand Valley know nothing about our calendar.

Old Indian Carving

Stone near Guelph, Ontario, bears witness to the fact that the Centuries before Columbus discovered America, an artist was at work in the Grand Valley of the Ohio, Ontario. On a huge flat stone fifty yards from the junction of the Irvine and Grand Rivers, the result of his handiwork, has been discovered by a party of Guelph citizens.

The face and figure are worn smooth by the action of water during centuries. But the carving is there for the curious to see. The rock is too large to have been moved where, with care or quiet endeavor, time on the rock remove all suggestion of a modern pattern.

Many of the modern pattern can be seen in the stone, which is said to date a rock carving 1122, when Columbus first arrived in this hemisphere in 1492, is a problem which is not worrying Guelph.

Any Old Time

Finding out the time in Alverton, Ohio, is a tough job. Ask one man and you'll get one kind of time, ask another and you'll be an hour late, and a third, and you might be an hour early. Some folks in this town go by sun time, railroad men go by central time and others go by eastern time, which is the official time of the state.

Spacer Law In China

In certain districts of China, each citizen in a village or town is responsible for the behaviour of his ten nearest neighbors. Should the whole community commit a crime all are held to account and share the punishment equally with the principal offender.

A Mineral Curiosity

Asbestos Is Heavy As Rock Yet Mechanically Treated

Asbestos is the only mineral that can be woven into thread and garments and molded into instruments impracticable to flame. With asbestos, armor and tools men can fight even a flaming oil fire. The messenger drops of forest rangers in California are clad in asbestos coats to defy timber fires. The material, fibrous and crystalline, elastic and brittle, heavy as rock in its crude state, yet as light as thistle down when treated mechanically, has withstood the heat and enormous pressure of volcanic fire and earth adjustment, apparently without alteration.

Changes in temperature cannot make it expand or contract. Since the earth was in its infancy these veins of silky fibres have survived when the hardest rock has worn or melted away.

Some believe that those who survive volcanic disasters are the very fibres were clad in asbestos, while ancient writers tell of a "stone curtain" used to form handkerchiefs, the fabrics "cleansed by coating them into fire."

Asbestos, in various forms, in holders, mats and stands, and asbestos composition floors are but a few of the modern conveniences made from this mineral curiosity.

Would Be Helpful

Farm Research Work Should Prove Valuable To Agriculturists

There is considerable to commend the suggestion that Canada should join in the scheme for the establishment of farm research bureaus throughout the British Empire. The scheme would make it possible for many years to come to meet some of the worst fields and the farms. The suggestion is that the scientific methods in both directions has already resulted in greatly increased production. As the scheme makes it possible for there will be all the greater need to utilize the discoveries of the experts in increasing the yield of the soil. Research work carried on in the various Dominion and Colonies that compete the Empire, properly collected and disseminated, should prove of great value, not only to Canadian producers, but to farmers throughout the British Empire and South Africa and India no doubt have something to teach Canadian agriculturists. As Canada, agriculture has been something they can profitably study, in connection with the cultivation of the land. A system of mutual exchange of data, statistics and the results of experiments and research work cannot but tend to increase the value of such work by making its results available to all concerned. — Regina Leader.

Not Dangerous Occupation

New Devices Have Made Flying Safer

With the march of science, new machines are bound to make their appearance, and it is significant that new public opinion in Canada. As it is sponsored by the Aviation League of Canada, which is doing much to establish flying clubs throughout the Dominion, it can be regarded as an authentic source of news which is eagerly well known, and as an agency in the development of flying in this country it is welcome.

Aviation is still a young science, and most people remember the first time they saw an airplane in flight. The path to progress has been strewn with accidents which have taken toll of many brave lives, and it is hard for those who remember all these pioneering fatalities to get rid of the idea that flying is a dangerous occupation.

But, as the June issue of "Canadian Pilot" points out, the statistics show that the number of accidents per hour of flight is very small.

"During 1927, British air transport lines' machines travelled 87,000 miles, and carried a total of 20,314 passengers, and for the third successive year had no accidents involving deaths or injury to any passenger. During 1928 Deutsche Luft-Reederei's passenger machines flew 3,818,153 miles and transported 56,208 passengers without a single accident."

These facts speak for themselves. Parents need not be so backward in letting their boys take to the air as to profess to be afraid of new safety devices which, Sir Alan Cobden says, have made flying safer than motor cars and truly a period of the newspapers every week bears out that claim.

Has Accurate Memory

Englishman Has Trained His Mind To Remember

"On what day did July the First fall? Anno Domini 1927. This was the rather strange question I put to Mr. James C. Gillies, a writer for the Herald-Mirror correspondent. "Without the slightest hesitation, he replied: 'The 1st of July.' "And on what day will December 15 fall? Anno Domini 1927." Again the answer came true. "On a Thursday." "Such is the power of Mr. Gillies, who claims that, through sheer training and nothing else, he can give the day of any date between A.D. 1 and A.D. 4000—a million and a half days. Astrologists, students of the calendar, and students who delve into the relation between the celestial bodies and the events of the time, easily check the accuracy of Mr. Gillies' memory. Mr. Gillies, who was born in Highgate, near London, 20 years ago, and is a clerk employed by a Mithram firm, says that he adopted his curious hobby of remembering dates when he was about 20.

New Device For Camera

Pictures Of Elephants' Growth Taken Through A Microscope

A new device for automating the growth of various organisms has been perfected by Carl D. Clarke, medical illustrator of the Johns Hopkins Hospital, Baltimore. Mr. Clarke has taken pictures through a microscope of a flower's growth, the beating of a turtle's heart and the movement of organisms in Rogofofth cheese and in vinegar, without continuous running of the camera and consequent waste of film and power. If the development of a rose is photographed or a fly shown emerging from its egg into active life, the shutter of the camera must be controlled to avoid refocusing the same picture.

Mr. Clarke has devised an eight-day clock low the mechanical system can be set at any desired interval from seconds to half hours. The clock controls an electric motor that cranks the camera.

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

"You must tell me what you say for that?"

"Yes, I haven't."

Interesting Local Items

A box social and whist drive will be held in St. Ambrose parish hall on Thursday, Nov. 1st.

Mrs. L. Harris returned last week end from the hospital. Her friends will be glad to know she is feeling much improved.

Mrs. Cathcart was taken to the Medicine Hat hospital last Tuesday suffering from an attack of flu. She is now greatly improved.

A ladies' fashion note says: "for evening wear a large chiffon handkerchief is carried." Well, everybody thought it would eventually come to that. Next year the handkerchiefs will likely be shortened.

Two papers in one—The Family Herald and Weekly Star, Montreal—one for the farm, the other for the home, both of superior excellence. One dollar a year covers the subscription, or three years for \$2.00

Mrs. Leo Lydell, of Vancouver, stopped over in Redcliff last Monday on her way back home from a visit in the east.

FOUND—In Redcliff, a watch Owner may get same from E. Schmidt at glass factory by paying expenses.

Notice to Threshermen

Owners or operators of threshing machines and combine harvesters are required to send to the Department of Agriculture at the end of the threshing season, a return showing the number of acres and number of bushels threshed. This applies whether the machine has been used for custom work or only for the owner's crop.

Special forms for these returns may be secured from the **PUBLICITY DEPARTMENT, Department of Agriculture, Edmonton**

The Greatest Radio Value Ever Offered

Westinghouse

Westinghouse

6 Tube CONSOLE
for only \$167.⁰⁰ Uses UX-201-B Radiotrons

When you buy a Westinghouse Battery Console Radio you own a beautiful instrument that embodies the latest improvements at a price that represents more radio value than has ever been offered before.

It gives you

Full 6-tube power, using the new

Westinghouse UX-201-B and UX-

121-B Westinghouse Radiotrons.

Selectivity, finely balanced, giving

equal performance in the upper and

lower wave bands.

True-to-life tone quality—both high

and low notes reproduced with equal

fidelity.

Economy of operation. The new

UX-201-B Radiotron uses only half as

much filament current as the former standard UX-201-A, thereby reducing the cost and frequency of "A" battery recharging.

Distant stations brought in with ease and clarity.

New improved cone speaker, developed by Westinghouse, and many other features which we will be glad to show.

Single dial control.

Hear a Westinghouse Demonstrated and Judge Its Value For Yourself
